EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Edward Stemberger on 05 November 2009.

The application has been amended as follows:

Claim 1 (currently amended): A method of fabricating manufactured aggregates wherein the following steps are performed:

supplying a first material comprising particles of sand; supplying cement, water, and elements forming a second material; mixing a certain quantity of said first material with a certain

quantity of cement, water, and each of said elements of said second material, so as to obtain a mortar made up of inclusions corresponding to the first material and a matrix corresponding to the second material;

subjecting the mortar to a first cure for a certain first cure duration; and

crushing said mortar so that breaks are not within the inclusions to obtain manufactured aggregates of size lying in the range 2 mm to 15 mm so as to obtain a degree of roughness; and

hydrating the crushed mortar by another cure during a certain cure duration.

Claims 15-20 are CANCELLED

2. This application is in condition for allowance except for the presence of claims 15-20 directed to an invention non-elected without traverse. Accordingly, claims 15-20 have been cancelled.

REASONS FOR ALLOWANCE

3. The following is an examiner's statement of reasons for allowance:
- a. The applied prior art fails to teach or suggest the crushing step where the mortar is crushed such that the breaks in the mortar are formed not within the inclusions.
 - b. The applied prior art does not teach partially curing a mortar, crushing said mortar, and then again curing said crushed mortar until the grains are sufficiently hardened.
4. The closest available prior art, U.S. Patent Application Publication 2003/0109592 to David M. Shulman, teaches the manufacture of an artificial aggregate by mixing cement, sand, water, & elements, then curing, and then crushing. 03/592 does not teach or suggest sequential partial curing, crushing so that the inclusions do not break, and further curing of the crushed particles until sufficient hardness is achieved.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John P. Robitaille whose telephone number is (571) 270-7006. The examiner can normally be reached on Monday to Thursday from 8:00 AM to 4:00 PM. The examiner can also be reached on alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joe Del Sole can be reached on (571) 272-1130. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
